

HIGH INTENSITY GRADIENT MULTI-LAYERS MAGNETIC ROLLERS

Brief introduction:

As the most effective equipment for purifying materials, magnetic roller separator has the following characteristics

1. Automatic separation of magnetic and non-magnetic materials, continuous operation
2. Design single-layer or multi-layer magnetic roller according to user needs
3. The standard diameters are 100mm, 150mm and 180mm respectively, and the width of the magnetic roller can reach up to 1500mm

This equipment can be widely used in industrial minerals, refractory materials, heavy ores, food and chemical products, precision plastics, ceramic and glass raw materials, electronic waste.
