

MAGNETIC BOX

Product describe:

Drawer Type Permanent Magnetic Grills are used for separation of iron particles from dry, granular or free flowing product / materials. Drawer Magnetic Grills are made by using stainless steel having (Round or square or rectangular) with magnetic rods mounted on drawer.

The Drawer Type grills are made up of magnetic elements, which are fitted in a drawer and is moving in a housing. Magnetic Elements are made up of hard ferrite ceramic magnets or high intensity rare earth magnets (Ndfeb). All the components are made up of Stainless Steel 304/316 material. The overall construction of the magnetic grills can also be made as per the customer specification and sizes.

The grills are efficiently utilized if contamination is within 1% to 1.5% by weight. For higher levels of contamination Drawer Grills or Multi Drawer Grills should be used.

	Round Grill
	Rectangular and Square Grill
